

GOD'S WAR

Out of the dark clouds of temptation rides death on a steaming drug steed,

He's riding with destruction, confusion, and greed

Off in the distance I hear morning soul sing

It's not the people it's that thing

And the thing has great I powers

But it's conscience is blind

So when hooked to the mill whose life do we grind

It's God's war

Who you going to fight for

Our children will pay the price which ones will we sacrifice

it's God's war

Just how many times have you walked these streets

watching all the people dancing to a worldly beat

Some dance slow and some dance fast

They're just doing what they can to make time pass

What makes one stroll and makes the other one grind

Is it what's in their hearts or what's in their minds

I've seen so many lead blindly through the iron gates

Not understanding the smoke from their glass 38s

It's God's War

Are they all just victims of circumstance

Or has history created a fatal dance

I feel the presence of their evil plots

Is this to plan for God's seed

No I think not it's God's War

What a great price for mercy our brother Jesus has paid
And we don't even thank him when's the last time our families joined hands to pray
But he said what was done in the darkness would be brought to the light
So when given the choice on whose side do we fight
It's God's war
America it's time to put down your drugs and pick up God's gun
Time to save your children's future not teaching them that all your sins are so much fun
It's God's war
Now who are you going to fight for
Your children will pay the price Which ones will you sacrifice
It's God's war
